

HYDROGEN™

THE WORLD'S FIRST HOLOGRAPHIC MEDIA MACHINE.
IN YOUR POCKET. NO GLASSES NEEDED.

With one fell swoop... the future of personal communication, information gathering, holographic multi-view, 2D, 3D, AR/VR/MR, and image capture just changed forever.

The HYDROGEN ONE is a standalone, full-featured, unlocked multi-band smartphone operating on Android OS that just happens to add a few additional features that shatter the mold of conventional thinking.

GLASSES OBSOLETE

Wearable displays not spoken here. It is no longer necessary to carry (or charge) another device to enjoy multi-dimensional content. Experience "look around depth" in the palm of your hand, no glasses or headsets in sight.

•5.7" PROFESSIONAL HYDROGEN HOLOGRAPHIC DISPLAY

This incredible retina-riveting display advancement features nanotechnology that seamlessly switches between traditional 2D content, holographic multi-view content, 3D content, and interactive games... both landscape and portrait modes supported.

- View all traditional 2D content normally at full screen resolution
- View holographic RED Hydrogen 4-View content (H4V)
- View stereo 3D content
- View 2D/3D VR, AR and MR

ASSAULT YOUR SENSES

Embedded in the OS is a proprietary H3O algorithm that converts stereo sound into expansive multi-dimensional audio. Think 5.1 on your headphones. The perfect match for holographic H4V or just listening to your favorite tunes. The difference this makes would be enough to justify the entire system.

MODULARITY

HYDROGEN ONE is the foundation of a future multi-dimensional media system. The HYDROGEN SYSTEM incorporates a new high-speed data bus to enable a comprehensive and ever-expanding modular component system, which will include future attachments for shooting higher quality motion and still images as well as HYDROGEN format holographic images.

COMMAND CENTRAL

The HYDROGEN ONE will not only be the control center for the HYDROGEN system, it will also integrate into the professional RED camera program, working together with Scarlet, EPIC and Weapon as a user interface and monitor.

RED CHANNEL

One channel to find all 4-View holographic content. Create .h4v (or convert 3D to .h4v) content and upload. Download or stream to view. Movies, documentaries, games, shopping and other apps all found with one click.

PRICE. \$1195 Aluminum. \$1595 Titanium.

Orders placed today will ship from my own personal first production batch. I can also assure you that after this initial release we will NOT be able to fill all orders on time due to display production limitations. We will NOT guarantee these prices at the time of release. Taxes and shipping not included in the price.

WHAT DO YOU GET?

The HYDROGEN ONE Media Machine with a USB-C cable and charger, an expandable Micro SD card slot plus a "special small token" for ordering early. All other accessories available at launch will be available at an additional price. Additional modules will NOT be immediately available at the time of this first production launch.

WHEN DO YOU GET IT?

The HYDROGEN ONE is targeted to ship Q1 2018.

Design shown may change. This offer will be available for a limited time.

Specs and delivery dates can change anytime and for any reason. Payments are fully refundable for any reason prior to shipping.
